Farewell spring...and HELLO SUMMER!

We're blazing into the summer season – thinking, innovating, creating, and giving our customers exactly what they want.

We know school is out, but this month we're going to have a little class on the differences between booths and banquettes.

Then we'll cap it off with a show-and-tell session with our latest install. Enjoy!

Here's a hot take: There is a difference between booths and banquettes. While it's true they seem similar, there are key features unique to each.

In the end, both can work for your space, so it's more a matter of seating choice and aesthetic. Click below to read our blog on the differences

Talk about modular decor!

Here we have an L-shaped banquette with a vertical channeled back, featuring metal legs for some added height. It fits against the kitchen island perfectly!

We love it when residential customers think outside the box and test out Soft Touch's capability. They dreamed, and we delivered!

Bottom line: We don't just make furniture for restaurants and hotels...we make it for anyone needing innovative seating solutions!

Latest Installation

Check this one out: Here we have an outdoor banquette (left), with an upholstered back and seat, and awesome wooden square legs. Perfect for summer dining!!
